

BEST PRACTICE - 1

Title – Inculcating Scientific Temper through Science Exhibition

1. Goals : 1.To inculcate Scientific Temper among the stakeholders of the college and to establish proper platform to outreach the activities of the college.

2. Objectives : The college is one of the lead colleges of the district and having well equipped Science departments both at UG as well as PG level. The research activities are also going on in the college. The departments such as Chemistry, Botany, Physics, Computer Science, Biotechnology, Electronics etc. are renowned Departments. Moreover, library of the college is enriched with recent reference books and journals. The campus is also beautiful. Therefore, we believe to introduce our college to the students of secondary and higher secondary schools. Therefore, Science Exhibitions are organized, annually, in which all science departments contribute. The students and faculty members of respective departments have designed, developed and exhibited the different projects, modules, live experimentation, posters, equipped laboratories etc. Following are the objectives of this best practice.

- To invite students and teachers of secondary and higher secondary schools (X and XII standards) from Sangli and other peripheral villages.
- To encourage students and teachers of the college to develop and present innovative ideas and projects.
- To expose the students to well equipped laboratories, infrastructure, sports and other facilities and support services available on the campus.
- To introduce the students to the diverse programs and courses available in the college.
- Counseling of the students to opt for this college for their further higher education.

3. The context : The college is one of the lead colleges of the district, having various programmes and courses and putting relentless efforts to impart quality education to the masses of the area. It is also observed that, students admitted to this college are from rural and agricultural background. Many of them are first generation learners. They do not really understand the need of higher education and quality of the same. Moreover, these students and their parents are also unknown with the infrastructural and academic facilities of the college. Science exhibition is an excellent platform to reach out to the students. Therefore, a science exhibition is annually arranged in the college. All departments participate in this event. Students of this college and visiting students acquire recent trends in science and technologies.

4. The Practice : The college organizes such type of science exhibition every year. Each department exhibits their ideas and projects in dedicated section realizing scientific environment in the college. Therefore, each department is one exhibiting unit. It also ensures participative management wherein various committees are constituted for smooth conduct of program. These committees also showcase students representation. The theme of the exhibition covers the following broad areas.

- Chemical experiments and model reactions.
- Physical experiments and innovative projects.
- Life science demonstrations and models.
- Electronic circuits projects and demonstrations.
- Mathematical models and charts.
- Food adulteration demos
- Biotechnology experiments and demonstration.
- Programming modules and applications
- Research facilities.

5. Evidence of success: Every year the Science Exhibition is successfully organized. All departments participate in this science exhibition. Students and teachers of secondary schools and Junior colleges visit this exhibition. They are inspired and hence most of them prefer to pursue their higher education from this college.

BEST PRACTICE - 2

Title of the Practice: “Character Building and Personality Development through Lecture Series”.

- 1. Objectives of the Practice:** I) To enhance ideological ability of the students through various lectures. II) To make them more physically and mentally empowered. III) To guide the students on the burning issues that take place in the society. IV) To counsel the students in terms of their careers, health. V) The main objective of this lecture series is to guide the students for all round development and make them an ideal citizen. VI) To aware them about career opportunities available in different fields.
- 2. The Context:** The students taking traditional education are moving away from reading and writing so with the proper guidance through the lecture series, they can definitely brighten their future. The lecture series also helps to develop students’ ideology through lectures in various areas like academic, Economic, social, political, science and technology, career opportunities in competitive examinations, personality development, arts, sports, literature and mental health etc. From this point of view this lecture series is very effective and useful for the students.
- 3. The Practice:** While choosing a topic in the lecture series, the subject is selected in such a way that it will be useful to all the students in the arts faculty. Eminent lectures were organized for the overall development of the students such as career opportunities after graduation, Technic of data collection in social science research, Women’s nutrition and fitness, Relevance of yoga and meditation for mental health, Career opportunities in history, Population policy : Indian and China, Marathi Vishwakosh Nirmitti Mandalache Bhashik Yogdan, Marathi language and social media, Marathi language and career opportunities in media, Jain philosophy, New opportunities and challenges in cultural domain, career opportunities in psychology etc.

Each department organized one / two lectures in 2020-21 academic year for the arts faculty. These lectures of eminent and knowledgeable speakers from different fields were arranged to enlighten the overall personality development of the student.
- 4. Evidence of success:** So far the lecture series has been very successful and beneficial to the students. The students are enriched with knowledge, confidence, soft skills and employability competencies.
- 5. Problems encountered and resources required:** We could not organize offline lectures due to Corona pandemic situation across India. Some students encountered the problem of connectivity and Net band width.
