Method of computing per day usage of Library (2020-21)

In the Central Library, per day usage of Library by the user community (Teachers and Students) is calculating by the following formula:

$$\text{No.of teachers and students using library per day} = \frac{\text{No.of Visitors (Teachers and Students)}}{\text{Total number of Working days}} = \frac{X}{Y}$$

During Academic Year 2020-21,

Total No. of Visitors (Teachers & Students) using Library = 8660 = X

& Total No. of Working days = 92 = Y

$$\text{No.of teachers and students using library per day} = \frac{\text{No.of Visitors (Teachers and Students)}}{\text{Total number of Working days}} = \frac{X}{Y}$$

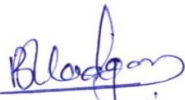

$$\text{No.of teachers and students using library per day} = \frac{8660}{92} = 94$$

No.of teachers and students using library per day = 94

Remark: Due to Covid-19 Pandemic in academic year 2020-21, average usage of library by teachers and students are significantly less.
